Proposal Type:
Concentration (ex. Dietetics)

Administration Details

Official Program Name	Agricultural & Biological Engineering: Renewable Energy Systems Engineering, BS	
Diploma Title	Bachelor of Science in Agricultural and Biological Engineering	
Sponsor College	Grainger College of Engineering	
Sponsor Department	Engineering Administration	
Sponsor Name	Ronaldo Maghirang, Kent Rausch	
Sponsor Email	ronaldom@illinois.edu, krausch@illinois.edu	
College Contact	Ashley Hallock ahallock@illinois.edu	College Contact Email
College Budget Officer	Tessa Hile tmhile@illinois.edu	

List the role for rollbacks (which role will edit the proposal on questions from EPC, e.g., Dept Head or Initiator) and/or any additional stakeholders. Purpose: List here who will do the editing work if proposal needs rolled back. And any other stakeholders.

Ashley Hallock, ahallock@illinois.edu; Ronaldo Maghirang, ronaldom@illinois.edu (ABE head); Kent Rausch, krausch@illinois.edu (ABE C&C)

Does this program have inter-departmental administration?
Yes

Interdisciplinary Colleges and Departments (list other colleges/departments which are involved other than the sponsor chose above)

Please describe the oversight/governance for this program, e.g., traditional departmental/college governance. Inclusion of/roles of elected faculty committees? Inclusion of/roles of any advisory committees.

Agricultural & Biological Engineering (ABE) programs are governed through a Courses and Curricula committee consisting of ABE faculty and ex officio officers. ABE students graduate through the Grainger College of Engineering. Curricula changes are reviewed by the Grainger College of Engineering as well as the College of ACES. As an engineering curriculum, the ABE degree programs are reviewed and accredited by the Accreditation Board for Engineering and Technology (ABET).

College	Agr, Consumer & Env Sciences
Department	Agricultural & Biological Engr

Is there an additional department involved in governance?
No

Proposal Title

Effective Catalog Fall 2024
Term

Proposal Title (either Establish/Revise/Eliminate the Degree Name in Program Name in the College of XXXX, i.e., Establish the Bachelor of Science in Entomology in the College of Liberals Art and Sciences, include the Graduate College for Grad Programs)

Establish a Concentration in Renewable Energy Systems Engineering in the Bachelor of Science in Agricultural and Biological Engineering in the Grainger College of Engineering

Does this proposal have any related proposals that will also be revised during the next 6 weeks? Consider Majors, Minors, Concentrations & Joint Programs in your department. Please know that this information is used administratively to move related proposals through workflow efficiently. Example: If you are revising the BS proposal and one related concentration within the next 6 weeks, "This BS proposal (key 567) is related to the Concentration A proposal (key 145)."

As part of the revision to the ABE BS (key 507) six concentrations are proposed, replacing the two existing concentrations (Agricultural, Biological):

1. Off-Highway Vehicle and Equipment Engineering, key 1174
2. Soil and Water Resources Engineering, key 1175
3. Bioprocess Engineering and Industrial Biotechnology, key 1176
4. Sustainable Ecological and Environment Systems Engineering, key 1177
5. Renewable Energy Systems Engineering, key 1178
6. Synthetic Biological Engineering, key 1179

The 10KL5163BSAG: Agricultural & Biological Engineering, BSAG program is not changed (key 72), with only minor updates. The Agricultural Engineering and Biological Engineering concentrations within the ABE BS (keys 732 and 733, respectively) are being phased down.

Program Justification

Provide a brief justification of the program, including highlights of the program objectives, and the careers, occupations, or further educational opportunities for which the program will prepare graduates, when appropriate.

Revisions to the Agricultural and Biological Engineering (ABE) major will provide more cohesive progression of introductory fundamental ABE courses during years 1 and 2, followed by distinctive concentrations in focused career fields. The concentrations will communicate to potential students and employers the capabilities of students graduating from the ABE major with one of the concentrations.

The revised ABE BS base will refine the curriculum to include a four semester common core, followed by four semesters within a student's chosen concentration. Each concentration has 30 credit hours required.

The RESE concentration defines a unique area of expertise within the ABE discipline, providing training to students in fundamental areas of engineering and applying them to a diverse array of systems involving design and production of energy from wind, solar and biofuel sources. The concentration has a foundation of 14 hr required courses in Engineering plus 16 hours of upper level electives focusing on climate processes, crop production or geology.

The Renewable Energy Systems Engineering (RESE) concentration meets the minimum of 40 hr upper-division classes for the IBHE requirement met by:

A total of 56 hours upper-division for the degree

- 300 & 400 level classes
 - o 17 hours minimum concentration specific courses
 - ABE 341 (3 hours)
 - ABE 425 (4 hours)
 - ABE 436 (3 hours)
 - ABE 488 (4 hours)
 - ATMS 307 or CPSC 415 or GEOL 380 (3 hours)
 - o 12 hours from the BS Core
 - ABE 340 (3 hours)
 - ABE 430 (2 hours)
 - ABE 469 (4 hours)
 - IE 300 or STAT 400 (3 hours)
 - 27 hours 200 level coursework with 2 or more prerequisites
 - o CHEM 232 (3 hours) - prerequisites of CHEM 104 and 105
 - o ECE 205 (3 hours) - prerequisites of PHYS 212, MATH 241 and PHYS 211
 - o PHYS 211 (4 hours) - prerequisites of MATH 231 and MATH 220 or 221
 - o PHYS 212 (4 hours) - prerequisites of MATH 241 and PHYS 211
 - o MATH 241 (4 hours) - prerequisites of MATH 231 and MATH 220 or 221
 - o MSE 280 (3 hours) - prerequisites of CHEM 102 and PHYS 211
 - o TAM 211 (3 hours) - prerequisites of PHYS 211, MATH 241 or 257
 - o TAM 251 (3 hours) - prerequisites of TAM 211, PHYS 211, MATH 241 or 257

Will there be any reduction in other course offerings, programs or concentrations by your department as a result of this new program/proposed change?

No

Does this new program/proposed change result in the replacement of another program?

No

Does the program include other courses/subjects outside of the sponsoring department impacted by the creation/revision of this program?

Yes

Courses outside
of the sponsoring
department/interdisciplinary
departments

ATMS 201 - General Physical Meteorology
ATMS 307 - Climate Processes
CPSC 112 - Introduction to Crop Sciences
CPSC 415 - Bioenergy Crops
GEOL 107 - Physical Geology
GEOL 380 - Environmental Geology
TAM 251 - Introductory Solid Mechanics
CEE 300 - Behavior of Materials
NPRE 475 - Wind Power Systems
MSE 280 - Engineering Materials
ECE 333 - Green Electric Energy
CHEM 232 - Elementary Organic Chemistry I
CHBE 478 - Bioenergy Technology

Program Regulation and Assessment

Plan to Assess and Improve Student Learning

Illinois Administrative Code: 1050.30(b)(1)(D) Provision is made for guidance and counseling of students, evaluations of student performance, continuous monitoring of progress of students toward their degree objectives and appropriate academic record keeping.

List the program's student learning outcomes. Each outcome should identify what students are expected to know and/or be able to do upon completing this program.

Student outcomes for the program are:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. an ability to communicate effectively with a range of audiences.
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Describe how, when, and where these learning outcomes will be assessed.

Describe here:

The process of periodical reviews is a continuous improvement process. The ABE Course and Curriculum Committee and the ABE Faculty Advisory Committee work with the department administration to maintain and revise the program educational objectives. The ABE Outcomes and Assessment Committee manages the processes of the development, collection and summarization of the program education objectives review data collection.

Student senior exit interviews are conducted by the Head. A written senior exit survey questionnaire is provided to each graduating senior at the end of the last semester of enrollment. All graduating seniors are asked to participate in a focus group to discuss the nature of their undergraduate experience. Participation in the senior exit interviews and the completion of the written senior exit questionnaire are voluntary. The information provided by the senior exit interview and questionnaires are compiled by the ABE Undergraduate Program Coordinator. The summary information is provided to the ABE Administration, the ABE Faculty Advisory Committee and the ABE Course and Curriculum Committee. The information is used to review the program educational objectives.

Alumni surveys also are used. ABE alumni are surveyed after graduation at 2, 5 and 10 year intervals post-graduation. A survey form is sent to each available alumnus via electronic media. Completed forms are compiled in a summary format. The information is available to the ABE faculty, administration and Courses and Curriculum Committee for reviewing the objectives.

Feedback from employers is provided by the ABE External Advisory Committee and companies representatives that work with the senior design team projects. The ABE External Advisory Committee meets on an annual basis with ABE administration, students, faculty and staff. The Committee provides feedback relative to PEOs as part of a committee report. This report is provided to faculty, administration and staff as a written report and a discussion presentation. Companies sponsor the ABE senior industry linked design projects, and representatives from these companies provide feedback to students and faculty about students' preparedness upon completion of the projects. This information is considered very useful in assessing and reviewing the program educational objectives.

Alumni surveys also are used to assess involvement of ABE graduates in the ABE profession. Participation in professional meetings and conferences is not formally assessed, but efforts are made on behalf of the ABE department to connect with graduates in professional activities through departmental sponsored receptions at annual ASBAE International Meetings, local ASABE section meetings, the Grainger College of Engineering annual open house, College of ACES annual ExplorACES open house, an annual ABE@Illinois on-campus event for all alumni and annual homecoming activities in conjunction with university events. These activities are not formally assessed, but they are discussed by the ABE department relative to our program quality and program educational objectives.

Identify faculty expectations for students’ achievement of each of the stated student learning outcomes. What score, rating, or level of expertise will signify that students have met each outcome? Provide rating rubrics as necessary.

This concentration is subject to the ABET accreditation process which assesses each learning outcome as well as the entire ABE BS program.

Explain the process that will be implemented to ensure that assessment results are used to improve student learning.

The RESE concentration will be assessed as a part of the overall ABE BS program according to standards and methods used by the Engineering Accreditation Commission of ABET, Inc. (abet.org). This accreditation process uses data collected during BS degree completion and post graduation to determine the extent that student learning outcomes were achieved and where improvement may be needed. Student assignments, exit interviews and feedback from alumni and employers are used for improving the program. The ABE Courses and Curriculum Committee and other select faculty preparing for ABET review will collect feedback regarding the BEIB concentration and ensure that courses map to the student outcomes and meet learning outcomes. Areas in need of improvement will be identified and recommendations for improvement will be specified that can be implemented in future years. The systematic assessment of student outcomes will be used to track progress and improvement goals.

Program of Study

Baccalaureate degree requires at least 120 semester credit hours or 180 quarter credit hours and at least 40 semester credit hours (60 quarter credit hours) in upper division courses” (source: <https://www.ibhe.org/assets/files/PublicAdminRules2017.pdf>). For proposals for new bachelor’s degrees, if this minimum is not explicitly met by specifically-required 300- and/or 400-level courses, please provide information on how the upper-division hours requirement will be satisfied.

Attach Program of Study-related information such as sample sequences (for undergraduate programs) or college-level forms. [ABE curriculum revisions side by side 20231117.xlsx](#)

Programs of
Study Catalog

Graduation Requirements
Minimum Overall GPA: 2.0

Minimum hours required for graduation: 128 hours, to include a minimum of 40 hours of upper-division coursework generally at the 300 and/or 400 level. These hours can be drawn from all elements of the degree.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement. One of the Social and Behavioral Sciences (SBS) courses must include one of the following economics courses: [ECON 102](#), [ACE 100](#), [ACE 210](#), [ACE 251](#) or [ACE 255](#). [ABE 469](#) will satisfy a technical core course and the Campus General Education Advanced Composition requirement.

Orientation and Professional Development

Financial Resources

How does the unit intend to financially support this proposal?

This concentration requires no additional financial resources as it will build upon current courses offered. No additional faculty will be needed to support the concentration as proposed.

Will the unit need to seek campus or other external resources?

No

Attach letters of support

Faculty Resources

Please address the impact on faculty resources including any changes in numbers of faculty, class size, teaching loads, student-faculty ratios, etc.

No major changes are anticipated in class sizes, although enrollments in some required courses may increase slightly.

Library Resources

Describe your proposal's impact on the University Library's resources, collections, and services. If necessary please consult with the appropriate disciplinary specialist within the University Library.

Courses specified in the proposed Concentration already exist. Therefore, new or increased Library resources will not be needed. Existing Library collections, resources and services are sufficient to support this program.

HLC Section

Credit Hours

Existing or repackaged curricula (Courses from existing inventory of courses):	Number of Credit Hours: 91	117 Percent of Total:
Revised or redesigned curricula (Courses for which content has been revised for the new program):	Number of Credit Hours: 9	11 Percent of Total:
New curricula (Courses developed for the new program that have never been offered):	Number of Credit Hours: 0	0 Percent of Total:

Total Credit Hours of the Program:	Number of Credit Hours:	128
100		Percent of Total:

New Faculty Required

Will new faculty expertise or new faculty members be needed to launch this program?

No

Please explain existing coverage:

Courses taught within the department for this Concentration are already being offered by existing faculty. All courses listed in the Concentration have room for modest increases in enrollment.

Additional Funds

Will the proposed program require a large outlay of additional funds by the institution?

No

Institutional Funding

Please explain institutional funding for proposed program:

No additional institutional funding will be needed.

Dear Heather,

I apologize for the delay—I thought I'd already responded.

Yes, MechSE is supportive and can accommodate these new concentrations.

Regards,
Tony

Dr. Jacobi,

I am following up on the below email regarding the new concentrations in ABE. As part of one or more of these concentrations, we are proposing to specify one or more of your courses as part of the Program of Study.

At your convenience, could you please confirm if we have support from TAM? We need these letters before we can move our proposals forward.

Please let us know if you have any questions.

Thank you in advance,

HEATHER CRUMP

Subject: ABE - New Concentrations

Dear Dr. Jacobi,

The Agricultural and Biological Engineering (ABE) department is revising its BS program and creating six new concentrations:

BEIB	Bioprocess Engineering and Industrial Biotechnology
OHVEE	Off-Highway Vehicle and Equipment Engineering
RESE	Renewable Energy Systems Engineering
SWRE	Soil and Water Resources Engineering
SEESE	Sustainable Ecosystems and Environmental Systems Engineering
SBE	Synthetic Biological Engineering

As part of one or more of these concentrations, we are proposing to specify one or more of your courses as part of the Program of Study. We anticipate about 10-15 students in the ABE BS program to take these courses each year. In some cases, our ABE students have been enrolling in your courses as part of a more general program of study. For your department, the courses listed are:

TAM 251	Introductory Solid Mechanics	OHVEE
TAM 251	Introductory Solid Mechanics	RESE
TAM 335	Introductory Fluid Mechanics	OHVEE
TAM 335	Introductory Fluid Mechanics	RESE
TAM 335	Introductory Fluid Mechanics	SWRE
TAM 335	Introductory Fluid Mechanics	SEESE

Please let me know if you have any questions. Thank you.

April 17, 2023

Professor Kent Rausch
Chair, Department of Agricultural and Biological Engineering Courses and Curriculum
Committee

Dear Professor Rausch,

The Department of Chemistry (CHEM) is supportive of the proposed new concentrations in your B.S. program. CHEM is happy to provide access to the following:

- CHEM 232: Elementary Organic Chemistry I as a science requirement, with the possible addition of 10-15 students per cohort.

In the event that the numbers grow far larger than this, we may ask your Department to sponsor a discussion section, as other units do (discussion sections usually have one teaching assistant per 24 students).

Congratulations on your exciting proposed program. If you need more information, please contact me at 333-7680 or at murphycj@illinois.edu.

Best Regards,

Catherine J. Murphy
Head, Department of Chemistry
Larry R. Faulkner Endowed Chair in Chemistry

Subject: CEE feedback RE: ABE - Six New Concentrations
Date: Thursday, April 6, 2023 5:26:42 PM
Attachments: [image001.png](#)

Dear ABE Colleagues,

CEE can accommodate 10-15 students in the classes listed. Our Chair of the Undergraduate Curriculum Committee suggests the following:

"if the RESE concentration is best taking CEE 300 or if CEE 340 would be better. In the past, we had restricted CEE 340 to CEE students only, but not in recent years. If the advanced composition change goes through for CEE 340, it might fulfill many of the same requirements of CEE 300, aside from the difference in course hours (3 for CEE 340 vs. 4 for CEE 300)."

If you need further discussion, please contact John Popovics our Associate Head for Undergraduate programs.

488 (3)		

Select six hours from the following:		6
ABE 450	International Water Project I	3
ABE 452	Engineering for Disaster Resilience	3
ABE 457	NPS Pollution Processes	2
ABE 458	NPS Pollution Modeling, Data Management and Analysis	3
ABE 459	Drainage and Water Management	3
CEE 330	Environmental Engineering	3
CEE 350	Water Resources Engineering	3
CEE 380	Geotechnical Engineering	3

Sustainable Ecological and Environmental Systems Engineering

Course List

Code	Title	Hours
------	-------	-------

Total Required: 30

Required courses:		18
ABE 341	Transport Processes in ABE	3
ABE 425	Eng Measure Systems	4
TAM 335	Introductory Fluid Mechanics	4
CEE 330	Environmental Engineering	3
IB 150	Organismal & Evolutionary Biology	4

Select one of the following:		3
ABE 450	International Water Project I	3
ABE 451	International Water Project II	3
ABE 452	Engineering for Disaster Resilience	3
ABE 456	Land & Water Resources Engineering	3

Select one of the following:		2 to 4
ABE 436	Renewable Energy Systems	3
ABE 457	NPS Pollution Processes	2
ABE 458	NPS Pollution Modeling	3
ABE 459	Drainage & Water Management	3
ABE 476	Indoor Air Quality Engineering	4
CEE 434	Environmental Systems I	3
CEE 440	Fate Cleanup Environ Pollutant	4

Select two from one of the following sets:		
Ecological Systems		6 to 7
IB 452	Ecosystem Ecology	3
NRES 219	Applied Ecology	3
NRES 348	Fish & Wildlife Ecology	3
NRES 362	Ecology of Invasive Species	3
NRES 418	Wetland Ecology & Management	3
NRES 419	Env & Plant Ecosystems	3
NRES 420	Restoration Ecology	3
NRES 429	Aquatic Ecosystem Conservation	3
NRES 439	Env & Sustainable Development	3
NRES 485	Stream Ecosystem Management	4

OR

Horticultural Systems		6 to 7
HORT 100	Introduction to Horticulture	3

HORT 341	Green House Mgmt & Production	4
HORT 435	Urban Food Production	3

OR

Animal Systems		7 to 8
ANSC 100	Intro to Animal Sciences	4
ANSC 363	Behavior of Domestic Animals	4
IB 329	Animal Behavior	3

Synthetic Biological Engineering

Course List

Code	Title	Hours
Total Required:		30

Required courses		18
CHEM 232	Organic Chemistry	4
ABE 341	Transport Processes in ABE	3
ABE 425	Eng Measure Systems	4
ABE 446	Biological Nanoengineering	3
MCB 150	Molecular & Cellular Basis of Life	4

Select one course from the following:		3
CHBE 458	Synthetic Nanomaterials	3
CHBE 472	Techniques in Biomolecular Engineering	3
CHBE 473	Biomolecular Engineering	3
CHBE 474	Metabolic Engineering	3
BIOE 430	Intro Synthetic Biology	3
MSE 470	Design & Use of Biomaterials	3

Select 9 hours from the following (no more than 3 hr at the 100-200 level):		9
MCB 100	Introductory Microbiology	3
MCB 250	Molecular Genetics	3
MCB 252	Cells, Tissues, and Development	3
MCB 450	Introductory Biochemistry	3
MCB 424	Microbial Biochemistry	3
IB 150	Organismal & Evolutionary Biology	4
IB 204	Genetics	3
IB 432	Genes & Behavior	3
IB 472	Plant Molecular Biology	1
IB 473	Plant Genomics	1
IB 103	Introduction to Plant Biology	4
CPSC 261	Biotechnology in Agriculture	3
CPSC 265	Genetic Engineering Lab	3
CPSC 352	Plant Genetics	4
CPSC 452	Advanced Plant Genetics	3
CPSC 466	Genomics for Plant Improvement	2
IB 420	Plant Physiology	3
IB 421	Photosynthesis	3
IB 411	Bioinspiration	3
IB 104	Animal Biology	4
ANSC 100	Intro to Animal Sciences	4
ANSC 221	Cell, Metabolism, and Genetics	3
ANSC 224	Animal Reproduction and Growth	4
ANSC 350	Cellular Metabolism in Animals	3

ANSC 431	Advanced Reproductive Biology	3
ANSC 446	Population Genetics	3
NRES 201	Introductory Soils	4
NRES 475	Environmental Microbiology	3

Summary		
General Education requirements		12
Humanities	6	
Cultural Studies	3	
Additional SBS	3	
Composition I		4
Language Other Than English		4
Orientation and Professional Development		3
Foundational Mathematics and Science		33
Agricultural and Biological Engineering Technical Core		36
Concentration		30
Free Electives		6
Total for Graduation		128

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This sample curriculum plan makes the assumption that the foreign language graduation requirement has been satisfied by completing three years of study of a single foreign language in high school. For more information, see the corresponding section on the Degree General and Education Requirements page (<http://catalog.illinois.edu/general-information/degree-general>-
