Proposal Title

Effective Catalog  Fall 2023

Proposal Title (either Establish/Revise/Eliminate the Degree Name in Program Name in the College of XXXX, i.e., Establish the Bachelor of Science in Entomology in the College of Liberals Art and Sciences, include the Graduate College for Grad Programs)

Eliminate the concentration in Pharmaceutical Engineering in Bioengineering in the Master of Engineering in Engineering in the Grainger College of Engineering and the Graduate College

Do this proposal have any related proposals that will also be revised during the next 6 weeks? Consider Majors, Minors, Concentrations & Joint Programs in your department. Please know that this information is used administratively to move related proposals through workflow efficiently. Example: If you are revising the BS proposal and one related concentration within the next 6 weeks, "This BS proposal (key 567) is related to the Concentration A proposal (key 145)."

Program Justification

Provide a brief description of what changes are being made to the program.

We are eliminating the pharmaceutical engineering concentration from the MENG in bioengineering programs.

Why are these changes necessary?

Due to lack of faculty resources to teach the core classes required under the pharmaceutical engineering concentration under the M.Eng. degree umbrella, we temporarily suspended admission to this concentration last year. In reviewing the department's faculty hiring plan, there is not a focus on adding faculty in this area. The proposal to terminate this concentration was approved by the committee during the 10/21/22 M.Eng. Advisory Committee meeting, a letter is attached. The program has never accepted applications. Thus, there are 0 students enrolled and 0 graduates.

Instructional Resources
Will there be any reduction in other course offerings, programs or concentrations by your department as a result of this new program/proposed change?

No

Does this new program/proposed change result in the replacement of another program?

No

Does the program include other courses/subjects outside of the sponsoring department impacted by the creation/revision of this program?

No

Program Regulation and Assessment

Plan to Assess and Improve Student Learning

_Illinois Administrative Code: 1050.30(b)(1)(D)_ Provision is made for guidance and counseling of students, evaluations of student performance, continuous monitoring of progress of students toward their degree objectives and appropriate academic record keeping.

List the program's student learning outcomes. Each outcome should identify what students are expected to know and/or be able to do upon completing this program.

_Not applicable_

Describe how, when, and where these learning outcomes will be assessed.

Describe here:

Identify faculty expectations for students' achievement of each of the stated student learning outcomes. What score, rating, or level of expertise will signify that students have met each outcome? Provide rating rubrics as necessary.

Explain the process that will be implemented to ensure that assessment results are used to improve student learning.

Is the career/profession for graduates of this program regulated by the State of Illinois?

No

Program of Study

_Baccalaureate degree requires at least 120 semester credit hours or 180 quarter credit hours and at least 40 semester credit hours (60 quarter credit hours) in upper division courses" (source: https://www.ibhe.org/assets/files/PublicAdminRules2017.pdf). For proposals for new bachelor's degrees, if this minimum is not explicitly met by specifically-required 300- and/or 400-level courses, please provide information on how the upper-division hours requirement will be satisfied._

Master of Engineering in Bioengineering

bioemeng.illinois.edu

Interim Head of Department: Michael Insana
Faculty Director of the M.Eng. Programs: Dipanjan Pan
Academic Program Contacts: Liezl Bowman (Program Coordinator)
1102 Everitt Laboratory
1406 W. Green St.
Urbana, IL 61801
(217) 333-1867
E-mail: liezlb@illinois.edu

Major: Bioengineering
Degrees Offered: MEng
Concentration: Bioinstrumentation, Computational Genomics, General Bioengineering, and Pharmaceutical Engineering

Graduate Degree Programs
The M.Eng. in Bioengineering is designed to bridge the skills gap by developing students with advanced technical know-how, a better understanding of the medical healthcare industry and more business acumen through coursework and project work, which provides students exposure to real world industry issues. For more information, visit bioemeng.illinois.edu.

Admission
Students must select one of the concentrations under the M.Eng. in Bioengineering program to apply to and will not be able to complete multiple concentrations. Students should have an undergraduate degree in an engineering or a science related field or must have taken engineering or science related coursework. Applicants should have a minimum grade point average of 3.00 (A = 4.00) or equivalent for the last two years of undergraduate study and show evidence of strong quantitative skills and of serious interest in the life sciences through their personal statement. Students with less than a 3.0 GPA may be considered for a limited status admission. Students in the program do not have automatic admission to the Ph.D. program in any engineering department. All applicants whose native language is not English must submit a minimum TOEFL score of 103 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) academic exam scores of 7.0 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria are met. Applicants with lesser scores may still apply. Limited status is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses based on an ESL Placement Test (EPT) taken upon arrival to campus.

Financial Aid
The tuition and fees for the M.Eng. in Bioengineering are the standard Graduate and Professional Programs rates for the College of Engineering, plus a $2000 program fee.
For tuition information and external funding resources, please visit bioemeng.illinois.edu. Students in the M.Eng. in Bioengineering program are not eligible for tuition-waiver generating assistantships.

Program Features

Academic Level: Graduate

Is This a Teacher Certification Program?
No

Will specialized accreditation be sought for this program?
No

Additional concentration notes (e.g., estimated enrollment, advising plans, etc.)

Delivery Method

This program is available:
On Campus - Students are required to be on campus, they may take some online courses.

Enrollment
List the prerequisites including course titles and number of credit hours for each prerequisite course, and whether or not these prerequisites count in the total hours required for the minor.

Phase Down/Elimination Enrollment
Does this program currently have enrollment? No
Describe how this revision or phase down/elimination will impact enrollment and degrees awarded. If this is an elimination/phase down proposal include the plans for the students left in the program.
   No students are currently enrolled in the pharmaceutical engineering MENG concentration.

Number of Students in Program (estimate)
Year One Estimate 5th Year Estimate (or when fully implemented)

Budget
Will the program or revision require staffing (faculty, advisors, etc.) beyond what is currently available? No
Additional Budget Information

Mark Anastasio
Donald Biggar Willett Professor in Engineering
Head, Department of Bioengineering

Dear Mark,

I am writing in my capacity as the Chair of the Master of Engineering Advisory Committee to notify you that the committee voted to permanently remove the computational genomics concentration (1PKS5544MENG and 1PKS5544MENU for online) and pharmaceutical engineering concentration (1PKS5860MENG & 1PKS5860MENU for online).

These two concentrations were already temporarily suspended while we considered possible ways to keep them in the program. The Advisory Committee has now voted to permanently suspend both concentrations since the courses in the concentration are not in alignment with current faculty expertise nor planned departmental hiring areas.

Please find attached the minutes from our meeting.

Sincerely,

Jennifer “Jenny” Amos
Teaching Professor
Laura Hahn Faculty Scholar
Director, Master of Engineering in Bioengineering
